

ISE 5001: Technology Transfer and Commercialization

1. ADMINISTRATIVE INFORMATION

Subject	Prof. Kelvin W. Willoughby	
Lecturer:	Visiting Professor, The Hong Kong Polytechnic University Professor & Chairholder, HHL Leipzig Graduate School of Management, Germany Email: gstvlk@polyu.edu.hk Web: www.DrKelvinWilloughby.com & www.hhl.de	
Subject	Prof. C. F. Benny Cheung	
Coordinator:	Tel: 2766 7905 Email: Benny.Cheung@polyu.edu.hk	
Teaching	Ms. Zhoumiao He	Mr. Zhikai Yang
Assistants:	Email: zhou-miao.he@connect.polyu.hk	zhikai.yang@connect.polyu.hk
Administrative	Miss Michelle Wong	
Staff:	Tel: 2766 4118 Email: michele.wong@polyu.edu.hk	

2. OVERVIEW

The rapid movement of technology across borders, the configuration of the organization's intellectual property, and the process of marketing technology throughout the commercialization cycle, pose a unique set of challenges and opportunities in today's competitive business environment. "Technology transfer and commercialization" is the process of developing practical applications using the results of technical and scientific research and engineering development. Successful commercialization of research is almost always multidisciplinary in nature and involves scientists, engineers, economists, and marketers. It requires a company to do more than mastering technology; it must also build complementary assets, address new market needs and meet challenges from new rivals. In today's technology-driven society, an environment in which the process of commercialization has become a key success factor, it is important that all parties involved be familiar with the process to maximize the chance of cost-effective, successful commercialization of inventions.

As a compulsory subject in the MTM program, ISE5001 will examine the subject of the technology transfer and commercialization in its broadest sense. It will provide participants with an understanding of various concepts in intellectual property, the technology transfer process, organizational dimensions of technology commercialization, strategic choices among commercialization pathways, and business planning tools for technological entrepreneurship. It also aims to help participants to familiarize themselves with the elements, requirements, pitfalls and intellectual challenges of technology commercialization strategy through engagement in a hands-on team-based technology licensing exercise.

3. LEARNING OBJECTIVES

This subject is aimed to provide the students with:

- (i) theory and practice in technology transfer and commercialization;
- (ii) working knowledge and skills to plan and implement technology assessment, market assessment, and alignment of technology in technology transfer and transmission processes;
- (iii) understanding of issues concerning the roles of various intellectual property rights, sustainability and competitive advantage, science and technology policy, start-ups, and licensing and spin-off companies.

4. LEARNING OUTCOMES

Upon completion of the subject, students will be able to:

- apply appropriate mechanisms of technology transfer and commercialization;
- understand and assess customer-needs driven technology specifications, technology alignment, and technology transfer process;
- assess technology licensing agreements and to evaluate start-up and spin-off companies;
- recognize the importance and role of intellectual property rights, government, research institutes and commercial institutions in technology transfer and commercialization;
- work in teams to conduct and review technology licensing negotiations.

5. METHOD OF ASSESSMENT

As shown in Table 1, this is a 100% continuous assessment subject that is comprised of assignments with individual and group components, and a final test. All assessment components require students to learn how to apply what they have learnt to practical situations.

The individual assignment allows the students to reflect on their understanding of the topics expected in learning outcome (b) and (d). The negotiation exercise (conducted in-class, requiring preparation in teams outside the class) allows the students to gain quick experience in applying knowledge gained in the classes for learning outcomes (a), (b), (c), (d) & (e). This will require preparation and submission of a team report after the in-class exercise. It will also require an in-class individual presentation based on the team exercise. Both cover learning outcomes (a), (c), (d) & (e) and additionally challenge students to further cultivate skill in reflecting conceptually and about professional practice in technology commercialization. These two assessments also challenge students to gain deeper understanding of core themes of the course by re-interpreting them in the light of the lessons learnt from the in-class technology licensing negotiation exercise. An individual presentation in the form of a video-recorded reflective journal, as well as the final written test (open book) will both assess the overall understanding of the student for the concepts and knowledge necessary for achieving learning outcomes (a) to (d).

Table 1: Summary of Assessment Components

Specific assessment methods/tasks	% weight	Intended learning outcomes to be assessed				
		a	b	c	d	e
Individual Assignment (<i>individual</i>)	20%		✓		✓	
Team Assignment (<i>teamwork / individual grade</i>): Negotiation Exercise	27.5%	✓	✓	✓	✓	✓
Individual Presentation (<i>individual</i>): Negotiation Exercise	5%	✓		✓	✓	✓
Individual Presentation (<i>individual</i>): Reflective Journal	7.5%	✓	✓	✓	✓	
Open Book Test (<i>individual</i>)	40%	✓	✓	✓	✓	
Total	100 %					

1. Individual Assignment – Case Analysis (20%)

Preparation of a case analysis (2,000 words **maximum**) of a Spanish university spin-off company — active internationally in the field of fractal antennae technology for mobile telecommunications — facing threats from competitors who copied their technology without permission.

Case: *Fractus: Sell Products or Sell Technology?*
 (“Fractus” case)

Author: Jordi Vinaixa, Xavier Ferras, Winnie Vanrespaille

Publisher: ESADE, CLADEA-BALAS Case Consortium, 22 September 2025.

HBS case product number: D0037-PDF-ENG.

Deadline: **due before 12.00pm (midnight) on Sunday 8th November 2026**

Instructions for the Individual Assignment:

Read the case and then write an analysis of the case addressing the following four questions:

- (i) What are the advantages and disadvantages of the intellectual property protection strategy Carles Puente and Rubén Bonet adopted during the early stages of their venture?
- (ii) What alternative intellectual property protection strategies might Carles Puente and Rubén Bonet have adopted during the early stages of their venture, given the status of their company as an early-stage academic spin-off?
- (iii) What are the main options available to *Fractus* from 2006 onwards for surviving as a business in the face of international competition?
- (iv) Put yourself in the position of Carles Puente and Rubén Bonet in September 2006. What business model would you adopt to re-build the company’s competitive advantage? Make sure you articulate the main intellectual property aspects of your strategy. Give reasons for your choice.

The case analysis must be no longer than 2,000 words, it must be the original work of each individual student, and it must be prepared specifically for this course.

2. Team Assignment - Negotiation Exercise, Report and Individual Presentation (32.5%)

The licensing game itself will be conducted during Sessions 15 & 16 on Day 4 (11th October 2026, 12:30pm to 7:00pm). Following the game each team will prepare a team report based on its experience in preparing for the game and playing the game, as well as its insights as a result of playing the game. Each team member will receive an individual grade for his or her contribution to his/her team’s Post-game Written Analysis of the Negotiation Exercise (27.5% of total grade for the course). In addition, each individual team member will be required to make an individual presentation of one minute (worth 5%).

Licensing game: *Amicon-Jackson-Hemaglobal*

Based on the *Amicon Corporation* case authored by Noel Capon and E. Raymond Corey.

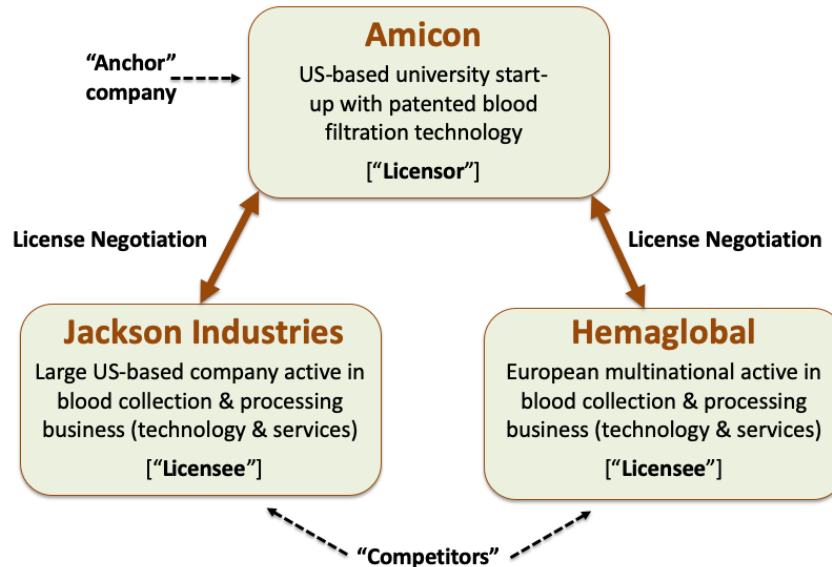

Publisher: Harvard Business School Publishing, Rev. 23 October 1989.

HBS case product number: 9-579-093.

The written materials for the game (a case study of “Amicon Corporation”, “Jackson Industries” and “Hemaglobal”) will be distributed via Blackboard. Students will be divided into nine teams (which will consist of five or six students) and each team will prepare in advance to play the game in class on 11th October. At the end of the game on 11th October each team will provide an impromptu verbal review of the process and result of its licensing deal and of the rationale for its approach adopted during the game. This will be followed up later with a team report, the *Post-game Written Analysis of the Negotiation Exercise* (due before midnight on **Sunday 2nd November ... i.e., by no later than 11:59pm on Sunday 1st November**).

Each student will receive an individual mark for his or her individual part within the team’s work. A grade will be allocated to each team based upon its performance in the actual licensing game and the quality of

its learning and analysis as a team during and after the game as demonstrated by the content and quality of the written team report. Each student will receive an individual mark for the team report based on peer-review evaluations of his or her contribution to the team's work.

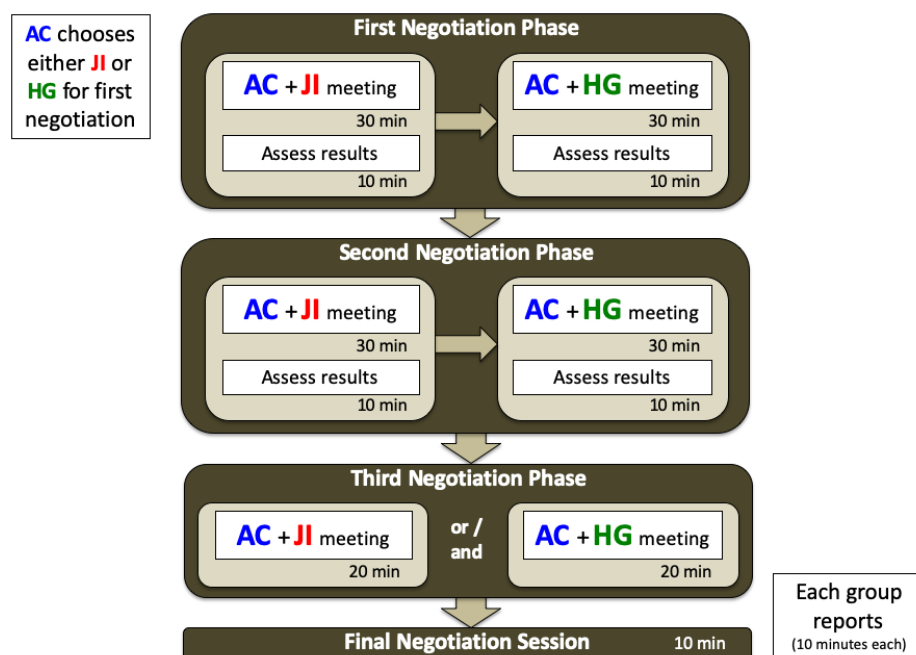

Playing the Technology Licensing Game

- (i) The class must form teams, with each team generally consisting of about six (6) members. The teams will be organized in to three (3) groups of three (3) teams, i.e. "Group A (Team A1, Team A2, Team A3)", "Group B (Team B1, Team B2, Team B3)" and "Group C (Team C1, Team C2, Team C3)". Within each group one team will act in the role of Amicon Corporation, one team will act in the role of Jackson Industries and one team will act in the role of Hemaglobal. The teams will be formed and assigned to their respective company roles by no later than Day Two of the course.
- (ii) During the period between Day Two of the course and Day Four of the course, all students should carefully study the "*Amicon Corporation*" case (20 pages) and meet together in their assigned teams to discuss the case and to plan a negotiation strategy for their team. Each team should allocate the following roles to their team members: team leader, chief technology officer, chief marketing officer, chief financial officer, chief legal officer and chief reporting officer. However, discretion is permitted in the way that functions are distributed between team members, so long as the functions are somehow covered. Teams should spend at least several hours meeting together face-to-face before Day Four of the course to discuss their team's proposed strategy for the negotiations.
- (iii) The negotiation game will take place online from 12:10 pm to about 7:00 pm on Sunday 11th October. Each of the three groups (consisting of three teams) will play the game separately, in parallel, in different locations (negotiation rooms). At the beginning of the negotiation exercise the team leader for the Amicon team will choose whether to meet with either the Jackson Industries team or the Hemaglobal team. The two teams will then commence negotiations to reach a provisional agreement on a license, while the third team waits. Initial negotiations will last for a maximum of thirty minutes.
- (iv) At the end of the first negotiation, the invited team should withdraw and the Amicon team should spend ten minutes assessing the results of the negotiation, and perhaps alter its negotiation strategy in the light of they have learned during the negotiation.
- (v) The other team (either Jackson Industries or Hemaglobal) should then be invited by the team leader of Amicon for a thirty-minute negotiation session, while the team that engaged in the first negotiation with Amicon waits.

- (vi) At the end of the second negotiation, the invited team should withdraw and the Amicon team should spend ten minutes assessing the results of the second negotiation, and perhaps make further adjustments to its negotiation strategy in the light of additional lessons they have learned.
- (vii) The first invitee should then be invited back by the team leader from Amicon for a second negotiation session. This session should last for thirty minutes.
- (viii) At the end of the second negotiation the first invited team should withdraw and the Amicon team should spend ten minutes assessing the results of the negotiations so far, and perhaps again change or refine its negotiation strategy in the light of lessons learned and insights gained.
- (ix) The other team should then also be invited back by the team leader from Amicon for a second negotiation session. This session should last for thirty minutes.
- (x) At the end of their second negotiation with Amicon the second invited team should withdraw. The Amicon team should then spend ten minutes deciding whether it wishes to invite either or both of the other two teams back for a third negotiation session. Preferably, only one such team will be invited for a third negotiation session, which should last for no longer than 20 minutes. The main purpose of this final negotiation session will be to finalize certain outstanding points in the tentative agreement (if there is one) or to make final concessions to the other party. Alternatively, the session may also be used to inform the invitee that Amicon has chosen a strategy involving the other company, or to merely dismiss the invitee on grounds that might perhaps leave the door open to future negotiations. Amicon may also, if it wishes, invite the other team back for one last negotiation session.
- (xi) Final negotiation session with chosen team (10 minutes).
- (xii) Following the final negotiation session, all team members should assemble in the base room.
- (xiii) The chief negotiators (or team leaders) of the three “Group A” teams (*Amicon A*, *Jackson A* and *Hemaglobal A*) will together engage in an impromptu live discussion of the process and results of the afternoon’s negotiations. Each leader will be permitted three-to-five minutes to present.
- (xiv) This exercise will then be repeated for the three “Group B” teams and the three “Group C” teams. The leaders from Groups B and C may also compare the results of their negotiations with the results in the other groups.
- (xv) The moderator (the lecturer) will then make observations of the processes and outcomes of the game and summarize lessons learned.

Negotiation Schedule (Sunday 11 October 2026)

Zero	12.10pm	All students assemble in the “base” room
	12.20pm	Amicon exits the base room and reassembles at its “corporate headquarters” (negotiation room)
<i>There will be a ten-minute break between each round of negotiations</i>		
One	12.30pm	Jackson team members move to Amicon’s corporate headquarters. Hemaglobal team members remain in the base room.
	12.35pm	First round of negotiations between Amicon and Jackson takes place.
	1.05pm	Jackson team members move back to the base room.
	1.15pm	Hemaglobal team members move to Amicon’s corporate headquarters. Jackson team members move back to the base room.
	1.20pm	First round of negotiations between Amicon and Hemaglobal takes place.
	1.50pm	Hemaglobal team members move back to the base room.
Two	2.00pm	Jackson team members move to Amicon’s corporate headquarters. Hemaglobal team members remain in the base room.
	2.05pm	Second round of negotiations between Amicon and Jackson takes place.
	2.35pm	Jackson team members move back to the base room.
	2.45pm	Hemaglobal team members move to Amicon’s corporate headquarters. Jackson team members move back to the base room.
	2.50pm	Second round of negotiations between Amicon and Hemaglobal takes place.
	3.20pm	Hemaglobal team members move back to the base room.
Three	3.30pm	Jackson team members move to the Amicon’s corporate headquarters. Hemaglobal team members remain in the base room.
	3.35pm	Third round of negotiations between Amicon and Jackson takes place.
	3.55pm	Jackson team members move back to the base room.
	4.05pm	Hemaglobal team members move to Amicon’s corporate headquarters. Jackson team members move back to the base room.
	4.10pm	Third round of negotiations between Amicon and Hemaglobal takes place.
	4:30pm	Hemaglobal team members move back to the base room. Amicon makes decision about license agreement. Amicon informs the other teams of its decision.
Final	5.00pm	Presentations and Discussion: All students meet in the base room. Each team member will make a one-minute presentation about his or her participation in the whole exercise and share one interesting observation about the process or outcome of the game. Each group will be permitted three minutes to discuss the process and outcome. Group A (three teams) goes first, followed by Groups B and C. Each team will submit a short written summary of highlights of the license agreement.
	5.00pm	Group A (three teams).
	5.30pm	Group B (three teams).
	6.00pm	Group C (three teams).
	6.30pm	The host (instructor) will summarize key insights of the day’s negotiation exercise.
	7.00pm	Celebrate!

2(a) Post-game Written Analysis of the Negotiation Exercise (27.5%)

A written report on the process, outcomes and lessons-learnt from the negotiations exercise must be prepared by each team. The **maximum** size of the report is 3,000 words (excluding appendices).

Deadline: Before Midnight, Sunday 1st November 2026 via the Blackboard System.

(i.e., one representative of the team should submit the report via the Blackboard assignment submission system on the evening of Sunday 1st November **before** 12.00pm midnight ... i.e., by 11.59pm).

The team’s report should highlight:

- (i) What happened during the negotiation? (i.e., describe the process)
- (ii) The results of the negotiation, no matter whether or not a successful deal was reached. If a successful deal was reached, discuss the terms that were concluded in the agreement. If your team was unsuccessful in reaching a deal, please explain why.
- (iii) Lessons learnt from the negotiation process itself.

- (iv) Discussion of fresh insights gained about the overall body of materials, ideas and principles of the course as a result reflecting about the process and results of the negotiation exercise

A summary of preparations and planning conducted by the team prior to the commencement of the actual game (including supporting materials) may be included, if wished, as an appendix or appendices (not included within the 3,000-word limit). The report should be written in prose, should be properly referenced and may include exhibits and other materials in the appendix or appendices (not included within the 3,000-word limit). Where appropriate, use may be made of pertinent reference materials other than those provided by the Lecturer.

Please ensure that the team leader of your team submits the final version of your report using your group and team number for the file name (e.g., *Amicon A*, *Jackson B*, *Hemaglobal C*, etc.) by the deadline via the **Blackboard assignment submission system**.

A grade will be allocated to each team based upon its performance in the actual licensing game and the quality of its learning and analysis as a team during and after the game, as demonstrated by the content and quality of the written report itself. Assessment of each individual student's performance for the *Post-game Written Analysis of the Negotiation Exercise* will be based on the team's score for the report, weighted by an individual peer evaluation score.

2(b) Individual Presentation – Negotiation Experience (5%)

Each individual team member will also be required to make a one-minute presentation (worth 5% of the total grade for the course) during the team-presentation session immediately after the completion of the negotiation. The presentation should include at least the following three parts:

- The specific role or position of the individual in the negotiation, such as leader, technology officer, marketing officer, financial officer, legal officer, reporting officer, etc.
- Summary of the work for which the individual had been responsible in the preparation-for and engagement-in the negotiation, and the results that were achieved.
- Summary and comment on the impact of individual's work on the negotiation results of the whole group.

Peer Evaluation of Individual Contributions to the Negotiation Exercise

Each individual student will receive a mark for the *Post-game Written Analysis of the Negotiation Exercise* based on the team grade for the report, weighted by a confidential peer-review assessment of his or her individual contribution to the team's work. A form on which the confidential peer-review scores may be indicated will be distributed to each student by the lecturer, via Blackboard. In other words, one single mark will be allocated to each team for *Post-game Written Analysis of the Negotiation Exercise*, but the final mark that each individual team member will receive for that assignment will be weighted according to peer evaluations from fellow team members. **The information provided in the peer evaluations will be kept absolutely confidential.**

Please grade each person in your team (*excluding* yourself) for his or her contribution to all aspects of the team project combined using the following five-point scale: A, B, C, D and F. Please upload your confidential peer evaluation grades, using the Peer Evaluation Form (available in **Blackboard**), to **Blackboard** before 12.00pm midnight on **Monday 2nd November 2026** at the latest. You should upload the completed Peer Evaluation Form to the "Negotiation Exercise: Peer Evaluation" sub-section of the Assessment section of **Blackboard**. Failure to submit the peer evaluation will result in you receiving a "zero" score (0%) for the Negotiation Exercise team work.

3. Individual Presentation – Reflective Journal (7.5%)

Each individual student will be required to make a recording of a verbal presentation of reflections about his or her learning during the course. The presentation should be **no longer than five minutes**.

Each presentation should include reflections about the ideas, principles and insights gained from the readings, lectures, discussions and other learning experiences during the course, including the Technology

License Negotiation Exercise. You should upload an MP4 recording of your presentation to Blackboard before 12.00pm midnight on **Sunday 15th November 2026** at the latest.

4. Open Book Test (40%)

In person (classroom) test, 2:30pm to 5:30pm **Saturday 24th October 2026**. A total of three hours will be permitted for the test.

Total of Assessments 1-4: 100%

Two Published Case Studies to be Studied During the Course

1. “Fractus”

Case: Fractus: Sell Products or Sell Technology?

Authors: Jordi Vinaixa, Xavier Ferras, Winnie Vanrespaille

Publisher: ESADE, CLADEA-BALAS Case Consortium, 22 September 2025.

HBS case product number: D0037-PDF-ENG.

Periodic reference will be made to this case (“Fractus”) by the professor during the course to illustrate various principles and themes in the course. It is essential that you read the case as part of your learning and assessment. This case will also be required for the individual assignment (Assessment Item 1), due on **8th November 2026**.

2. “Amicon – Jackson - Hemaglobal”

Case: Amicon Corporation (A)

Authors: Noel Capon and E. Raymond Corey

Publisher: Harvard Business School Publishing, 1978 (revised 23 October 1989).

HBS case product number: 9-579-093.

This case (“Amicon”) will be the basis for the classroom licensing game on Day 4 of the course (Sunday 11th October) which forms a core part of Assessment Item 2 (Negotiation Exercise). During the period between Day Two of the course and Day Three of the course, all students should carefully study the case and meet together in their assigned teams to discuss the case and to plan a negotiation strategy for their team.

6. STUDY PLAN AND SCHEDULE

This is a block-mode subject and the teaching is divided into four-and-a-half days of lectures and classroom activities and various group activities to be conducted outside the classroom. The topics to be covered include:

1. *Theory and practice*: Technology Entrepreneurship and Innovation; Technology Transfer & Transmission Process; Technology Commercialization Process; Role of Intellectual Property in Protecting Innovation
2. *Technology and Market Assessment*: Customer Needs Driven Product Specifications; Negotiating the Deal and Marketing the Innovation; Financial Plan and Selection of Innovation Projects; Innovation and Risk Management; Technology Valuation and Impact Analysis; Market Assessment and Alignment of Technology.
3. *Commercialization Strategy*: Coming Full Circle in the Commercialization Loop; Business Plan Science and Technology Policy; Negotiating and Monitoring the Licensing Agreement; Start-Up and Spin-Off Companies; Joint Venture.
4. *Case Studies*: Case studies drawn from commercial, industrial and research applications.
5. *Practical skills*: negotiation of technology licenses.

Academic Integrity

All assignments submitted during this course must be original and prepared specifically for this course. Plagiarism is not permitted and will not be tolerated. Assignments will be checked to ensure academic integrity.

Schedule of Tasks and Deadlines

Dates	Learning Activities and Deadlines
Before 3 October	Read “ Fractus ” case (Individual Assignment), report due on 10 November
3 October	Day One of classroom activities
Before 4 October	Read “ Amicon-Jackson-Hemaglobal ” case (first reading, individual)
4 October	Day Two of classroom activities
5-9 October	Re-read and analyze “ Amicon-Jackson-Hemaglobal ” case (second reading, team)
5-9 October	Prepare team strategy for playing the Technology License Game
10-11 October	Day Three and Day Four of classroom activities
11 October	Play the Technology License Game
12-23 October	Study lecture notes, prepare for test
24 October	Day Five of classroom activities. In-classroom test, 2:30pm-5:30pm.
12 Oct. – 31 Oct.	Work with team to prepare <i>Post-game Written Analysis of the Negotiation Exercise</i>
1 November	Submit <i>Post-game Written Analysis of the Negotiation Exercise</i> (before midnight)
2 November	Submit peer evaluation of fellow team members (before midnight)
8 November	Submit case-analysis for the “ Fractus ” case (Individual Assignment)
9-14 November	Preparation for individual presentation (reflective journal)
15 November	Submit video recording of individual presentation (reflective journal)
16 November	Celebrate!

Two Published Case Studies to be Studied During the Course

1. “Fractus”

Case: Fractus: Sell Products or Sell Technology?

Authors: Jordi Vinaixa, Xavier Ferras, Winnie Vanrespaille

Publisher: ESADE, CLADEA-BALAS Case Consortium, 22 September 2025.

HBS case product number: D0037-PDF-ENG.

Periodic reference will be made to this case (“Fractus”) by the professor during the course to illustrate various principles and themes in the course. It is essential that you read the case as part of your learning and assessment. This case will also be required for the individual assignment (Assessment Item 1), due on **8th November 2026**.

2. “Amicon – Jackson - Hemaglobal”

Case: Amicon Corporation (A)

Authors: Noel Capon and E. Raymond Corey

Publisher: Harvard Business School Publishing, 1978 (revised 23 October 1989).

HBS case product number: 9-579-093.

This case (“Amicon”) will be the basis for the classroom licensing game on Day 4 of the course (Sunday 11th October) which forms a core part of Assessment Item 2 (Negotiation Exercise). During the period between Day Two of the course and Day Three of the course, all students should carefully study the case and meet together in their assigned teams to discuss the case and to plan a negotiation strategy for their team.

Table 2: Teaching Schedule

Day 1 Saturday 3 rd October 2026	Session 1 (room QR403) (9:30 a.m. – 11:00 a.m.)	Session 2 (room QR403) (11:30 a.m. – 1:00 p.m.)	Session 3 (room QR403) (2:00 p.m. – 4:00 p.m.)	Session 4 (room QR403) (4:30 p.m. – 6:30 p.m.)
	1A: Subject Briefing 1B: Introduction (i): what is intellectual property (IP) and why is it important for technology commercialization and technology transfer?	- 2: Introduction (ii): what is intellectual property (IP)? - why is IP important for technology commercialization and technology transfer?	3: Patents - Concepts - basic patent concepts (invention patents, utility models, etc.) - patentability requirements	4: Trademarks - basic concepts - trademarks and technology commercialization - international dimensions of trademark law & administration
Day 2 Sunday 4 th October 2026	Session 5 (room V312) (9:30 a.m. – 11:00 a.m.)	Session 6 (room V312) (11:30 a.m. – 1:00 p.m.)	Session 7 (room V312) (2:00 p.m. – 3:30 p.m.)	Session 8 (room) (4:00 p.m. – 6:30 p.m.)
	5A: Patents - Practice international patent law & administration 5B: Intellectual property, international trade and economic development	6A: Copyright and digital rights management 6B: Registered design rights and design patents	7A: Trade secrets and confidential information 7B: Comparative review of different IP rights	8A: Contracts and the licensing of IP rights - basic concepts of technology licensing - designing a good technology license 8B: Introduction to the licensing game
Day 3 Saturday 10 th October 2026	Session 9 (room Z509) (9:30 a.m. – 11:00 a.m.)	Session 10 (room Z509) (11:30 a.m. – 12:45 p.m.)	Session 11 (room Z509) (1:45 p.m. – 3:30 p.m.)	Session 12 (room Z509) (4:00 p.m. – 6:30 p.m.)
	9A: University Technology Transfer & Intellectual Property 9B: Case study of a university licensing project	10A: Technology, products, markets, innovation and IP	11A: Intellectual property rights in the innovation process 11B: Essentials of technological entrepreneurship	12A: Innovation case study: <i>Nestlé & IP</i> 12B: Intellectual property strategy and open innovation
Day 4 Sunday 11 th October 2026	Session 13 (room V312) (9:30 a.m. – 10:10 a.m.)	Session 14 (room V312) (10:40 a.m. – 11:10 am)	Sessions 15 & 16 (V312 & negotiation rooms) (12:10 p.m. – 7:00 p.m.)	
	13A: Financing of technological entrepreneurship 13B: Technology commercialization and business planning	14: Integrative case discussion: <i>PikoGym</i>	Team-based technology-licensing negotiations exercise <i>All teams will assemble initially in the base room (V312). Negotiations will take place in break-out rooms owned by each individual Amicon team: Rooms V311, V313, V314.</i>	
Day 5: 2:30 pm to 5:30 pm, Saturday 24th October 2026 (classroom) [Three hours, same day] <i>Open BookTest (final assessment activity)</i>				
• Post-game Written Analysis of Negotiation Exercise due before 12.00 midnight, Sunday 1st November 2026. • Peer evaluation of individual team contributions due before 12:00 midnight, Monday, 2nd November 2026. • Individual assignment (“<i>Evewave</i>” case) due before 12:00 midnight, Sunday, 8th November 2026. • Video recordings of individual presentations due before 12.00 midnight, Sunday 15th November 2026.
